Revised syllabus with effect from August 2021

Department of Psychology is revising syllabi for students admitted for the academic year 2021 under the choicebased credit system. Every academic year is divided into two semester sessions. Each semester will have a minimum of 90 working days and each day will have 5 working hours.

PREAMBLE:

- **The Department of Psychology submits changes and additions suggested in the U.G curricula that are given in the ensuing pages.**
- **Modification of course contents based on feedback.**
- **Reference text books updated.**
- **E. learning resources added**

RULES AND REGULATIONS FOR THE PROGRAMME

1. ELIGIBILITY FOR ADMISSION:

Candidates for admission to the first year of the Degree of Psychology course shall be required to have passed the Higher Secondary Examinations by the Government of Tamilnadu or an Examination accepted as equivalent thereto by the syndicate of the University of Madras.

2. ELIGIBILITY FOR THE AWARD OF DEGREE:

A Candidate shall be eligible for the award of the degree only if she has undergone the prescribed course of study for a period of not less than three academic years, passed the examinations of all the six semesters prescribed.

3. COURSE OF STUDY:

The main subject of study for Bachelor Degree shall consist of the following:

PART – I: Foundation Courses exclusive for Languages.

PART -- II: English

PART – III: Core and Allied

PART --IV: Non major electives, soft skills, Environmental studies and value education

PART -- V: Extension activities / Sports / NCC

4. PASSING MINIMUM:

A Candidate shall be declared to have passed in each paper/practical of the main subject of study wherever prescribed, if she secured NOT LESS THAN 40 % of marks prescribed for the examination.

5. CLASSIFICATION OF SUCCESSFUL CANDIDATES:

PART I, II, III, IV.

Successful candidates passing the examination and securing the marks (i) 60 percent and above and (ii) 50 percent and above but below 60 percent in the aggregate shall be declared to have passed the examination in the FIRST and SECOND class respectively. All other successful candidates shall be declared to have passed the examination in the THIRD class.

Candidates who pass all the examinations (Part I, II, III and IV) prescribed for the course in the FIRST APPEARANCE ITSELF ALONE are eligible for ranking.

Programme Educational Objectives (PEO)

Our Programme will produce graduates with:

- PEO1: Apply and advance the knowledge and skills acquired, to become a creative professional in their chosen field.
- PEO2: Engage in self-directed continuous learning, aimed at global competency, which will promote professional and personal growth.
- PEO3: Develop management skills and entrepreneurial skills, by harnessing core competencies tempered by values and ethics.
- PEO4: Work towards achieving economic and social equity for women through application of relevant knowledge.
- PEO5: Contribute to promoting environmental sustainability and social inclusivity.

Programme Outcomes (PO)

At the end of the programme, the student will be able to:

- PO1: Promote and apply scientific knowledge for finding sustainable solutions to solve the issues pertaining to self and society,
- PO2: Identify, analyze and formulate novel ideas to yield substantial results in fields of research utilizing the principles of behavioural science.
- PO3: Relate key concepts and scientific principles to various scientific phenomenon and their applications in day to day life.
- PO4: Cultivate unparalleled comprehension of fundamental concepts relevant to psychology leading to individual progress and career advancement.
- PO5: Communicate effectively ideas in English.
- PO6: Generate solutions for problems and design processes that meet the specific needs for appropriate consideration for physical and mental health, cultural, societal and environmental conditions.

Programme Specific Outcomes (PSO)

After completion of the undergraduate programme in Psychology, the student will

- PSO1: Acquire knowledge on key concepts and theoretical approaches and gain understanding of the origin and recent advances in the discipline.
- PSO2: Be able to think originally, utilize the knowledge and understanding of Psychology to develop, appreciate and test the theoretical concepts for applications in various arenas.
- PSO3: Assess and critically evaluate central ideas and assumptions comprehensively facilitating research and analysis of data.
- PSO4: Use the relevant sources of scientific knowledge to identify and generate novel solutions for problems for enhancement of self and community.
- PSO5: Effectively communicate learned information both in written and oral format.
- PSO6: Develop capacity for individual and team work, understand and implement ethical principles necessary for professional upgradation.

L = Lecture Hours

T = Tutorial Hours

P=Practical Hours

H = Hours per week

C= Credits

CA=Continuous Assessment

SE= Semester Examinations

MM=Maximum Marks

***The Self study paper is offered only to the students with no arrears and who have obtained distinction in Part III (75%) in the first four semesters. However, enrolment to the paper is not mandatory. It is left to the choice of the student. Evaluation is internal for 100 marks. If a student is not obtaining the minimum 40 marks on 100 marks she will not be able to take it up as an arrear/ supplementary for this paper. It is mandatory for every student enrolled to pay the examination fee.**

**** Elective II - The student with more than 70% of the marks in major and allied papers upto the V Semester alone is eligible to opt between case studies or survey research. Students who take up case studies have to submit two reports for 100 marks and the student who carries out a survey need to carry out one survey research for 100 marks.**

***** On completion of IVth Semester, students can take up internships for an extra 1 credit, minimum of 14 days and must consist of an internship report with an internship certificate.**

****** A bridge course on Fundamentals of Case Analysis has been introduced for students in the third year to orient them to the Case Studies paper.**

EVALUATION PATTERN FOR CONTINUOUS ASSESSMENT-UG

INTERNAL VALUATION BY COURSE TEACHER/S

PART I, II AND III-THEORY PAPERS

COMPONENT	TIME	MAX.MARKS	CA MARK
1.*TEST I	2 HRS	50 MARKS (TO BE CONVERTED)	10
2.*TEST II	2 HRS	50 MARKS (TO BE CONVERTED)	10
3. ASSIGNMENT/SEMINAR/FIELD VISIT			10
4. PARTICIPATORY LEARNING			10

TOTAL 40

PART III- PRACTICAL PAPER (EXPERIMENTAL PSYCHOLOGY & PSYCHOLOGICAL TESTING)

COMPONENT	TIME	MAX.MARKS	CA MARK
1.*TEST I	2 HRS	50 MARKS (TO BE CONVERTED)	10
2.*TEST II	2 HRS	50 MARKS (TO BE CONVERTED)	10
3. ASSIGNMENT/SEMINAR/FIELD VISIT			10
4. PARTICIPATORY LEARNING			10
TOTAL			40

PART III- PROJECT - CASE STUDIES /SURVEY RESEARCH

CASE STUDIES: The internal evaluation for 40 marks will be based on Introduction and Case report.

SURVEY RESEARCH: The internal evaluation will be for 40 marks and distributed towards each of the 5 chapters.

SELF STUDY PAPER: Evaluation is only by Internal Examiner for a maximum of 100 marks

CA QUESTION PAPER PATTERN-UG

Knowledge Level	Section	Word Limit	Marks	Total
K 1	A-3X2 marks	50	6	50
K1, K 2	B-3/4x8 marks	400	24	
K2, K 3	C-1/2x20 marks	1200	20	

CA QUESTION PAPER PATTERN FOR PART IV

Knowledge Level	Section	Word Limit	Marks	Total
K 1, K2	A-5X10	350	50	50

RUBRICS FOR CONTINUOUS ASSESSMENT

Assignment	Content/originality/Presentation/Schematic Representation and Diagram/Bibliography
Seminar	Organisation/Subject Knowledge/Visual Aids/Confidence level/presentation-Communication and Language
Field Visit	Participation/Preparation/Attitude/Leadership
Participation	Answering Questions/Clearing Doubts/Participating in Group Discussions/Regular Attendance
Case Study	Finding the Problem/Analysis/Solution/Justification
Problem Solving	Understanding Concepts/Formula and Variable Identification/Logical Sequence/Answer
Group Discussion/Projects	Preparation/Situation Analysis/Relationship Management/Information Exchange/Delivery Skills
Role plays	Preparation ,Content delivered through the role , communication skills
Quiz	Most appropriate answer out of the four choices given – Key to be prepared by the Internal examiner

END SEMESTER EVALUATION PATTERN-UG

THEORY PAPERS

PART I/II/III

SEMESTER I/II/III/IV/V/VI

DOUBLE VALUATION BY COURSE TEACHER AND EXTERNAL EXAMINER

MAXIMUM MARKS: 100 TO BE CONVERTED TO 60

PASSING MARK: 40

PART IV

SINGLE VALUATION

ORAL TEST/WRITTEN TEST

MAXIMUM MARKS: 50

PASSING MARK: 20

PRACTICAL PAPERS

PART III

SEMESTER III & V

DOUBLE VALUATION BY COURSE TEACHER AND EXTERNAL EXAMINER

MAXIMUM MARKS: 100

PASSING MARKS: 40

PART III- PROJECT

CASE STUDIES

The external evaluation will be for 60 marks, both based on the report and End Semester Viva Voce Examination conducted by both the Internal and External Examiners

SURVEY RESEARCH

Project report should not exceed 50 typed pages.

The external evaluation will be for 60 marks, both based on the report and End Semester Viva Voce Examination conducted by both the Internal and External Examiners

SYLLABUS CONTENT

Semester – I Course Code: PS21/1C/BP1

Course Title: Basic Psychology – I

SEMESTER- I

Teaching Hours: 75 Hours

Credits: 4

Course Code: PS21/1C/BP1

L T P: 3 2 0

COURSE OBJECTIVES:

To offer the students a comprehensive overview and understanding of

- The Origins, Goals, Research Methods and Fields of Specialization in Psychology.
- The basic principles of sensation for vision, hearing, smell, taste and bodily senses.
- The principles of Perception and Illusion.
- Emotions and theoretical perspectives of emotions.
- Theoretical approaches to motivation.

COURSE OUTLINE:

Unit I: Introduction to Psychology: Definition, The Origins of Psychology: Influence of Philosophy, Influence of Physiology, Schools of Thought, Contemporary Psychology, Psychology in India, Goals, Research Methods and Fields of Specialization in Psychology. (10 Hours)

Unit II: Sensation: Basic principles of sensation – sensory thresholds – sensory adaptation; Vision- The nature of light, the human visual system, The Retina, The blind spot, visual processing in the retina, From eye to brain. Hearing – The nature of sound, the path of sound; Chemical and body senses – Smell, Taste, skin and body senses. (20 Hours)

Unit III: Attention and Perception: Attention- Definition, Selective Attention and Auditory Attention. Perception: Definition. Perceptual organization: Gestalt laws of organization, Top down and bottom up processing, The Perception of Shape, Depth Perception, Perception of Motion, Perceptual Constancies. Perceptual Constancy, Depth Perception, Perception of Motion and Illusion. (15 Hours)

Unit IV: Emotion: Definition. Functions of emotion. Components of Emotion: The Subjective Experience of Emotion, The Neuroscience of Emotion, The Expression of Emotion. Theories of emotion – James-Lange Theory of emotion, Cannon-Bard theory of emotion, Cognitive Theories of Emotion – Schachter and Singer’s two-factor theory. Richard Lazarus Cognitive Mediational theory; Facial expression and emotion – the facial feedback hypothesis (15 Hours)

Unit V: Motivation: Definition. Motivational Concepts and Theories. Motives and types of motives. Approaches to Motivation-Instinct Theories, Drive Theories, Incentive Motivation, Arousal Theory, Humanistic Approaches: Maslow’s hierarchy of needs and Deci and Ryan’s self - determination theory. Competence and Achievement Motivation. (15 Hours)

Quiz

QUESTION PAPER PATTERN –UG*

Knowledge Level	Section	Word Limit	Marks	Total	Special Instructions if any
K1	A- 10 x 2 Marks	50	20	100	Question No is compulsory. Section B to have at least one question from every unit. Section C not to have more than one question from the same unit
K1,K2	B-5/8 x 8 Marks	200	40		
K2, K3	C-2/3 x 20 Marks	500	40		

Since K1 levels are specified in Part A and Part B and K2 levels as specified in both Part B and Part C and K3 levels are specified in Part C, 40% of questions may be assigned to K1 and K2 levels each and 20 % for K3 level

Semester – I Course Code: PS21/1C/CHP Course Title: Psychology of Childhood
SEMESTER- I

Teaching Hours: 75 Hours

Credits: 4

Course Code: PS21/1C/CHP

L T P: 3 2 0

COURSE OBJECTIVES:

To help students understand

- Prenatal development, the birth process and postpartum period
- Physical, cognitive, language, emotional and personality development in infancy, early childhood and middle and late childhood
- Knowledge on attachment styles and Influence of social contexts in infant’s development
- How families and peers influence young children
- Influence of families, school and cultural environment on various domains of development in childhood.

COURSE OUTLINE:

Unit I: Prenatal development and birth: Genetic Foundations of Development; Course of Prenatal development; Teratology and Hazards to prenatal development; Birth process – Assessing the newborn; Postpartum period – physical adjustments, emotional and psychological adjustments
 (15 Hours)

Unit II: Infancy and toddler hood: physical and cognitive development: Physical growth and development – sleep, nutrition; Motor development – Dynamic systems view, Reflexes, Gross motor skills, fine motor skills; Sensory and Perceptual development – visual perception, other senses, intermodal perception. Cognitive development – Piaget’s theory of infant development – Sensorimotor stage
 (15 Hours)

Unit III: Infancy and toddlerhood: language and socio-emotional development: Language – Definition, Language’s Rule Systems, Development of language in infants, Biological and Environmental influences. Emotional development; Temperament; Personality development; Social

Orientation/Understanding; Attachment and its development; Social and cultural contexts influencing the infant's development (15 Hours)

Unit IV: Early childhood: Physical changes – Body growth and change, Motor Development, Nutrition and exercise. Cognitive Changes – Piaget's Preoperational Stage, Vygotsky's theory, Information processing. Language development; Emotional Development; Moral Development; Gender; Family and socio-cultural influence on young children's development; Peer Relations, Play and Television (15 Hours)

Unit V: Middle and Late childhood: Physical Changes and Health – Body growth and change, motor development, Exercise, Health, Illness and Disease; Cognitive Changes – Piaget's Concrete Operational Stage, Information Processing. Language Development; Development of Self- Self concept, self esteem; Emotional Development; Moral Development – Kohlberg's stages; Gender; Influence of families, friends, school and cultural environment; Influence of technology, its effects. (15 Hours)

COURSE OUTCOMES

CO.No	CO Statement
CO1	Describe the course of development of human and the influence of genetic and environmental factors on human life.
CO2	Explain the significance of development in various domains
CO3	Examine the influence of attachment styles and social contexts in the process of development
CO4	Compare and contrast healthy and unhealthy family environments on the developing child , relate it to real life situations and utilize this knowledge for fostering healthy environment
CO5	Infer the outcomes of development influenced by other environmental factors and plan strategies to create positive environment

QUESTION PAPER PATTERN –UG*

Knowledge Level	Section	Word Limit	Marks	Total	Special Instructions if any
K1	A- 10 x 2 Marks	50	20	100	Question No is compulsory. Section B to have at least one question from every unit. Section C not to have more than one question from the same unit
K1,K2	B-5/8 x 8 Marks	200	40		
K2, K3	C-2/3 x 20 Marks	500	40		

Since K1 levels are specified in Part A and Part B and K2 levels as specified in both Part B and Part C and K3 levels are specified in Part C, 40% of questions may be assigned to K1 and K2 levels each and 20 % for K3 level

Semester I Course Code: PS21/1A/BI1

Course Title: Biological Psychology – I

SEMESTER- I

Teaching Hours: 90 Hours

Credits: 5

Course Code: PS21/1A/BI1

L T P: 4 2 0

COURSE OBJECTIVES:

1. To place emphasis on the perspectives and research methods of Biological Psychology.
2. To examine the structure and Communication of the cells of the nervous system
3. To understand synaptic transmission.
4. To understand the Nervous System
5. To examine the nature and functions of the endocrine glands.

COURSE OUTLINE

Unit I: Introduction to Biological Psychology: Definition of Biological Psychology. Biological Explanations of Behavior. Research Methods of Biological Psychology: Methods of Studying the Nervous system: Methods of Visualizing and Stimulating the Living Human Brain. Recording Human Physiological Activity. Invasive Physiological Research Methods (20 Hours)

Unit II: The Cells of the Nervous System and Communication Within Neurons: The Cells of the Nervous System: Anatomy of Neurons and Glia. The Blood Brain Barrier, Nourishment of the Vertebrate Neurons. The Nerve Impulse: The Resting Potential of the Neuron, The Action Potential, Propagation of the Action Potential, Myelin Sheath and Saltatory Conduction. Local Neurons. (15 Hours)

Unit III: Communication Between Neurons: The Properties of Synapses. Relationship among EPSP, IPSP and Action Potentials. Chemical Events at the Synapse: The Discovery of Chemical Transmission at Synapses. The Sequence of Chemical Events at a Synapse. (15 Hours)

Unit IV: The Central Nervous System: Structure of the Vertebrate Nervous System: Terminology to describe the Nervous system. The Hindbrain. The Midbrain. The Forebrain. The Ventricles. The Cerebral Cortex: Organization of the Cerebral Cortex. The Occipital Lobe, The Parietal Lobe, The Temporal Lobe and The Frontal Lobe. The Peripheral Nervous System- Autonomic Nervous

System: Sympathetic and Parasympathetic Fibers, Cranial Nerves. The Spinal Cord: Ascending Fibers in the Spinal Cord, Descending Fibers in the Spinal Cord. (20 Hours)

Unit V: Hormones and Behavior: Hormones: Introduction and Definition. Principles of Hormones. Neural versus Hormonal Communication. Hormones – Classification by Chemical Structure. Endocrine Glands and its Specific Hormones : The Pituitary Gland; The Adrenal Gland ; The Thyroid Gland; The Gonads; The Pineal Gland; The Pancreas and The Parathyroid Glands. (20 Hours)

COURSE OUTCOMES

CO.No	CO Statement
CO1	Describe recent research methods and perspectives on the emerging field of behavioural neuroscience
CO2	Understand anatomy and functions of the basic cell of the nervous system
CO3	Explain the process of communication between neurons
CO4	Describe the complex orchestrated functioning of the nervous system
CO5	Understand the function of endocrine glands and relate the knowledge to understanding various human behaviour

Semester - II Course Code: PS21/2C/BP2

Course Title: Basic Psychology – II

SEMESTER- II

Teaching Hours: 75 Hours

Credits: 4

Course Code: PS21/2C/BP2

L T P: 3 2 0

COURSE OBJECTIVES:

To offer the students comprehensive overview and elaborate understanding of

- Learning theories highlighting on the principles of Classical and Operant Conditioning and Observational Learning.
- Memory, its stages and functions and strategies to improve memory.
- Components of thought, strategies of problem solving, decision making and reasoning and characteristics of Language.
- Theoretical contributions to intelligence and measurement of intelligence. To highlight on Artificial and Emotional Intelligence and Creativity.
- The theories of personality and its measurement.

COURSE OUTLINE:

Unit I: Learning: Definition, Theories of Learning: Classical Conditioning- Principles of Classical Conditioning, Factors that affect Classical Conditioning, Classical Conditioning and Drug Use, Cognitive Aspects of Classical Conditioning. Operant Conditioning: Thorndike and the Law of Effect, B.F. Skinner: Components of Operant Conditioning: Reinforcement – Types and Schedules, Punishment – Types, Effective and Ineffective methods of Punishment, Discriminative Stimuli. Cognitive Aspects of Operant Conditioning: Latent learning, Insight learning and Observational Learning.

(15 Hours)

Unit II: Memory: Definition, Models of memory: Stage model – Atkinson and Shiffrin –Sensory memory, Short-Term Memory and Long Term Memory, Levels of Processing Theory – Craik and Lockhart, Tulving’s Model- Types of Information in LTM. Retrieval cues: Meaning, Importance and factors affecting Retrieval: TOT, Testing Retrieval. Serial position effect and Encoding specificity principle. Flashbulb

memories. Reconstructing memories- Sources of Potential Errors. Forgetting: Hermann Ebbinghaus curve. Factors that Influence Forgetting. Improving memory (15 Hours)

Unit III: Thinking and Language: Thinking: Definition . The Building Blocks of Thought: Mental Images, Concepts and Prototypes. Problem Solving: Definition and Strategies. Obstacles to Problem Solving. Decision Making: Strategies: The Single Feature Model, The Additive Model, The Elimination by Aspects Model. Strategies Employed with Decisions involving Uncertainty. Reasoning: Inductive and Deductive Reasoning. Language: Characteristics. Language and Thought. (15 Hours)

Unit IV: Intelligence and Creativity: Definition, Nature of Intelligence. Determinants of intelligence Theories of Intelligence-Spearman, Thurston, Gardner, Sternberg, Guilford, Cattell, Jensen. Measuring Intelligence. Emotional Intelligence: Meaning and Domains. Artificial intelligence. Creativity: Meaning and Process, Characteristics of Creative Individuals . Fostering Creativity. (15 Hours)

Unit V: Personality: Meaning and Definition of Personality, Theories of Personality: Psycho-analytic theory, Other Psychoanalytic Views: Carl Jung and Alfred Adler, Humanistic Theories: Roger's Self-Theory and Maslow. Trait Theories: Allport and Cattell. Learning Theories: Social Cognitive Theories. Measuring Personality: Self-Report Tests of Personality, Projective Measures, Behavioral Observations, Interviews and Biological Measures. (15 Hours)

TEXT BOOKS:

1. Baron, R.A., & Misra, G. (2017). *Psychology: Indian Subcontinent Edition*. (5th e.d.). India.: Pearson India Education Services Inc.

Semester – II Course Code: PS21/2C/AAP

**Course Title: Psychology of Adolescence and
Early Adulthood**

SEMESTER- II

Teaching Hours: 75 Hours

Credits: 4

Course Code: PS21/2C/AAP

L T P: 3 2 0

COURSE OBJECTIVES:

To enable students to gain understanding of

- Physical changes in adolescence, the development of one's sexual identity and addressing the various issues in health
- Cognitive changes and role of schools in adolescent development
- The self, identity, spiritual and religious development along with understanding sexuality and influence of families and peers in adolescence
- Physical and cognitive development in early adulthood and the key dimensions of career and work
- Socio-emotional development and aspects of sexuality, attraction, love and close relationships in early adulthood

COURSE OUTLINE:

UNIT I: Adolescence- physical changes: Nature of Adolescence; Physical Changes – Puberty, Brain, Adolescent sexuality – developing a sexual identity, sexually transmitted infections; Issues in adolescent health – Nutrition and exercise, sleep patterns, leading causes of death, substance use and abuse, eating disorders. (15 Hours)

UNIT II: Adolescence- cognitive changes: Piaget's Theory – Formal Operational Stage, Evaluating Piaget's Theory; Adolescent Egocentrism; Information Processing – Decision Making, Critical thinking; Schools – Effective schools for young adolescents – Extracurricular activities, Service Learning (15 Hours)

UNIT III: Adolescence- socio-emotional development: The Self, Identity, and Religious/Spiritual Development – Self-esteem; Identity – Erikson's view, Developmental Changes – Marcia's statuses of identity; Emerging adulthood and beyond; Religious and Spiritual Development – Religion and

Identity development, Cognitive development and religion in adolescence, positive role of religion. Families – Parental monitoring, Autonomy and Attachment, Parent-adolescent conflict; Peers – Friendships, Peer groups, Romantic relationships; Culture and Adolescent development; Adolescent problems. Identity Formation- Erikson’s view, Marcia’s view, gender differences; relationship with family, peers and society. (15 Hours)

UNIT IV: Early adulthood- physical and cognitive development: Transition from adolescence to adulthood. Physical Development – Physical performance and development, Health, Eating and weight, Exercise, substance abuse; Sexuality – Sexual activity in emerging adulthood, sexual orientation and behavior, Sexually transmitted infections. Cognitive Development – Piaget’s view, Realistic and Pragmatic thinking, Reflective and Relativistic thinking, Post-formal thought, Schaie Life Span Model of Cognitive Development. Creativity; Careers and Work. (15 Hours)

UNIT V: Early adulthood- socio-emotional development: Stability and Change from Childhood to Adulthood – Temperament, Attachment; Attraction, Love and Close Relationships – Attraction, Physical attractiveness, Intimacy, Friendship, falling out of love; Adult lifestyles – single adults, cohabiting adults, married adults, divorced adults, remarried adults; Marriage and Family – Becoming a parent. (15 Hours)

TEXT BOOKS:

COURSE OUTCOMES

CO.No	CO Statement
CO1	List and describe critical biological changes during adolescence
CO2	Explore the influence of structured learning environments on cognitive functioning
CO3	Analyze the role of psychosocial factors on the developing self
CO4	Evaluate and differentiate changes in development with respect to physical ,cognitive and sexual self from early stages of development and its implications for everyday life
CO5	Understand and devise ways to initiate and sustain positive interpersonal relationships

Mapping of CO with PSO

QUESTION PAPER PATTERN –UG*

Knowledge Level	Section	Word Limit	Marks	Total	Special Instructions if any
K1	A- 10 x 2 Marks	50	20	100	Question No is compulsory. Section B to have atleast one question from every unit. Section C not to have more than one question from the same unit
K1,K2	B-5/8 x 8 Marks	200	40		
K2, K3	C-2/3 x 20 Marks	500	40		

Since K1 levels are specified in Part A and Part B and K2 levels as specified in both Part B and Part C and K3 levels are specified in Part C, 40% of questions may be assigned to K1 and K2 levels each and 20 % for K3 level

Semester II Course Code: PS21/2A/BI2

Course Title: Biological Psychology – II

SEMESTER- II

Teaching Hours: 90 Hours

Credits: 5

Course Code: PS21/2A/BI2

L T P: 4 2 0

COURSE OBJECTIVES:

To enable the students to understand:

1. Biological Rhythms, and Biological Basis of sleeping and Dreaming.
2. The Brain mechanisms of Thirst and Hunger
3. The Brain mechanisms in Emotions
4. The Biological Basis of Learning and Memory
5. Lateralization of brain's functions and the production and comprehension of Speech.

COURSE OUTLINE

Unit I: Circadian Rhythms, Sleep and Dreaming: Rhythms of Waking and Sleeping : Endogenous Cycles. Setting and Resetting the Biological Clock. Mechanisms of the Biological Clock. Sleep and Brain Mechanisms: Sleep and other Interruptions of Consciousness, The onset of Sleep and Hypnagogic Hallucinations, Stages of Sleep. Paradoxical or REM sleep. Brain Mechanisms of Wakefulness and Arousal. Brain Functions in REM Sleep. Functions of Sleep. Dreaming: REM Sleep and Dreaming. Biological Perspectives on Dreaming. (20 Hours)

Unit II: Biological Basis of Thirst and Hunger: Thirst: Mechanisms of Water Regulation. Osmotic Thirst. Hypovolemic Thirst and Sodium Specific Hunger. Hunger : Digestion and Food Selection. Short and Long Term Regulation of Feeding. Brain Mechanisms. (15 Hours)

Unit III: Biological Basis of Emotions: Emotions: Introduction. Emotions, Autonomic Arousal and the James-Lange Theory. Brain Areas Associated with Emotions. The Functions of Emotions. Attack and Escape Behaviors: Attack Behaviors. Fear and Anxiety. (15 Hours)

Unit IV: Biological Basis of Learning and Memory: Localized Representations of Memory. Types of Memory. The Hippocampus. Theories of the Function of the Hippocampus. The Basal Ganglia.

Other Types of Amnesia: Korsakoff's Syndrome and Alzheimer's Disease. Other Brain Areas in Memory: Parietal Lobe, Temporal Lobe and Prefrontal Cortex. (20 Hours)

Unit V: Lateralization and Language: Lateralization of Functions: The Left and Right Hemispheres. Visual and Auditory Connections to the Hemispheres. Cutting the Corpus Collosum. Language: Speech Production- Broca's Aphasia Speech Comprehension: Wernicke's Aphasia. (20 Hours)

TEXT BOOKS:

1. Carlson, N.R. (2001). Physiology of Behavior. (7thed.). Massachusetts: Pearson Education
2. Kalat, J.W. (2015), Biological Psychology (11thed.) New Delhi: Cengage Learning India Private Limited.

http://www.elaine-m-hull.com/lectures/biology_learning_memory_russia.pdf

<https://www.slideshare.net/alxndr01/chapter-14-lateralization-language-presentation>

COURSE OUTCOMES:

CO.NO	CO Statement
CO1	Describe the physiological basis of sleep and dream
CO2	Explain the physiological mechanisms underlying basic needs
CO3	Explain the role of central and peripheral nervous system in the experience of emotions
CO4	Describe the biological basis of learning and memory
CO5	Explore the difference in functions of the right and left hemisphere and list brain areas that are involved in speech functions.

Mapping of CO with PSO

Semester – III Code: PS21/3C/EXP

Course Title: Experimental Psychology

SEMESTER- III

Teaching Hours: 75 Hours

Credits: 4

Course Code: PS21/3C/EXP

L T P: 0 2 3

COURSE OBJECTIVES:

1. To demonstrate to the students, measurement of human capacities like perception, attention, learning and memory in a scientific setting.
2. To help students to gain knowledge of test conduction procedures
3. To help students to acquire knowledge on how to record, present and draw conclusions from the data, from the observations made.

LIST OF EXPERIMENTS (Any 10)

1. Division of Attention
2. Span of Attention
3. Distraction of Attention
4. Transfer of Learning - Habit Interference
5. Paired associate learning
6. Knowledge of Results
7. Concept Formation
8. Tweezer Dexterity Board
9. Muller-Lyer Illusion
10. Effect of Meaning on Retention
11. Retroactive Inhibition
12. Study of Emotional Expressions
13. Mental Fatigue Sheets
14. Minnesota Rate of Manipulation
15. Color Preference

TEXT BOOKS:

COURSE OUTCOMES:

CO.No	CO Statement
CO1	Experiment with testing human capacities such as perception, attention, learning and memory.
CO2	Relate the acquired knowledge of psychological processes to the method employed in testing.
CO3	Demonstrate understanding of how psychological processes can be established objectively.

CO4	Make observation, interpret and use the data obtained from measurement to analyze individual differences in human capacities
-----	--

Mapping of CO with PSO

CO/PSO	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6
CO1	3	3	3	2	3	3
CO2	3	2	3	1	3	3
CO3	3	2	3	2	3	3
CO4	3	3	3	2	3	3

KEY: Strongly Correlated -3, Moderately Correlated -2, Weakly Correlated -1. No Correlation -0

Teaching Methodology:

- Demonstration
- Discussion
- Individual / Team Work for administration and discussion of results.
- Administration of tests with individual members in community to understand the use of the tests.

Semester – III Code: PS21/3C/MLP

Course Title: Psychology of Middle and Late Adulthood

SEMESTER- III

Teaching Hours: 75 Hours

Credits: 4

Course Code: PS21/3C/MLP

L T P: 3 2 0

COURSE OBJECTIVES:

To enable students to gain understanding of

- The nature of middle adulthood with respect to physical, cognitive, career development and the role of religion
- The personality theories and important aspects of close relationships during middle adulthood
- Factors influencing longevity, course of physical and cognitive functioning, ageing, work and retirement and mental health problems in older adults
- The theories of socio-emotional development, personality development and discussing families and social relationships of aging adults
- The stereotypes of aging, and on the issue of death and dying within ones' cultural context.

COURSE OUTLINE

Unit I: Physical and Cognitive Development in Middle Adulthood: The Nature of Middle Adulthood: Changing Midlife, Defining Middle Adulthood; Physical Development: Physical Changes, Health and Disease, Mortality Rates, and Sexuality; Cognitive Development: Intelligence and Information Processing; Careers, Work and Leisure; Religion and Meaning in Life: Religion and Adult Lives, Religion and Health, Meaning in Life. (15 Hours)

Unit II: Socio-emotional Development in Middle Adulthood: Personality Theories and Development: Stages of Adulthood, the Life- Events Approach, Stress and Personal Control in Midlife, Contexts of Midlife Development; Stability and Change: Longitudinal Studies and Conclusions; Close Relationships: Love and Marriage at Midlife, Empty- Nest and its Refilling, Sibling Relationships and Friendship, Grand-parenting, Intergenerational Relationships. (15 Hours)

Unit III: Physical and Cognitive Development in Late Adulthood: Physical Development- The Young-Old, the Old-Old and the Oldest- Old; Biological Theories of Aging; The Aging Body: A Description; Sexuality; Health Problems. Cognitive Development- Cognitive Functioning in Older Adults: Multidimensionality and Multi directionality, Education, Work and Health, Training Cognitive Skills, Cognitive Neuroscience and Aging; Work and Retirement: Work and Adjustment to Retirement; Mental Health: Depression, Dementia, Alzheimer Disease and Other Afflictions, Fear of Victimization, Crime and Elder Maltreatment (15 Hours)

Unit IV: Socio-emotional Development in Late Adulthood: Theories of Socio-emotional Development: Activity- Disengagement Theory, Exchange Theory, Socio-emotional Selectivity Theory, Selective Optimization with Compensation Theory; Personality, the Self, and Older Adults in Society; Families and Social Relationships: Lifestyle Diversity, Older Adult Parents and their Adult Children, Great Grand-parenting, Friendship, Social Support and Social Integration, Altruism and Volunteerism; Impact of Gender and Culture; Successful Aging. (15Hours)

Unit V: Ageism, Death & Dying: Stereotypes of Aging; Positive and Negative Stereotypes, The Psychology of Prejudice, Breaking Negative Stereotypes; Death and Dying; The Death System and Cultural Variations; Issues in Determining Death; Decisions Regarding Life, Death and Health Care: Natural Death Act and Advance Directive, Euthanasia, Caring for Dying Individuals; Attitude Toward Death in Adulthood; Facing Death: Kubler- Ross' Stages of Dying, Perceived Control and Denial, Contexts in which people die, Communicating with a Dying Person; Making Sense of the World, Losing a Life Partner, Forms of Mourning. (15 Hours)

TEXT BOOKS:

COURSE OUTCOMES

CO.No	CO Statement
CO1	Explain the nature of middle age in all significant domains of development
CO2	Analyze the changing nature of self in relation to others in middle adulthood
CO3	Summarise the physical, cognitive and social functioning in old age
CO4	Sketch the changing nature of self in relation to others in late adulthood
CO5	Evaluate the experience of aging, death and Dying in different cultural contexts

QUESTION PAPER PATTERN –UG*

Knowledge Level	Section	Word Limit	Marks	Total	Special Instructions if any
K1	A- 10 x 2 Marks	50	20	100	Question No is compulsory. Section B to have atleast one question from every unit. Section C not to have more than one question from the same unit
K1,K2	B-5/8 x 8 Marks	200	40		
K2, K3	C-2/3 x 20 Marks	500	40		

Since K1 levels are specified in Part A and Part B and K2 levels as specified in both Part B and Part C and K3 levels are specified in Part C, 40% of questions may be assigned to K1 and K2 levels each and 20 % for K3 level

Semester III Code: PS21/3A/ST1

Course Title: Statistics for Psychology I

SEMESTER-III

Teaching Hours: 90 Hours

Credits: 5

Course Code: PS21/3A/ST1

L T P: 4 2 0

COURSE OBJECTIVES

1. To emphasize basic concepts, need and importance of statistics and education.
2. To impart knowledge on graphical representation of data
3. To enable students to plan, collect and organize data.
4. To familiarize students with steps and procedures involved in computing measures of central tendency and variability.
5. To enable them to select and choose appropriate statistical tools for analyzing and interpreting data.

COURSE OUTLINE:

Unit I: Introduction: Meaning of statistics, need and importance of statistics in psychology and education, Branches of statistical methods. Basic Concepts: Variables, Values and Scores. Scales of measurement- nominal, Ordinal, interval and ratio; organization of data- statistical tables, Frequency distribution. (15 Hours)

Unit II: Graphical and Diagrammatic representation of data: Objectives, Utility and Limitations. Types of Diagrams. Rules for drawing diagrams. Construction of frequency distribution graphs: Histograms and Bar graphs, Frequency Polygon and Ogive. Percentiles and percentile ranks. (20 Hours)

Unit III: Measures of Central Tendency- Mean, Median and Mode; Process of Computation and its Properties. Selecting a measure of central tendency. (15 Hours)

Unit IV: Measures of Variability- Range, Quartile deviation, Average deviation. Standard deviation and variance. Selecting a measure of variability. (20 Hours)

Unit V: Correlation: Meaning and Types; Correlation and Causation; coefficient of correlation and its interpretation; Rank difference method and product moment method (computation in ungrouped data) (20 Hours)

TEXT BOOKS

1. Garrett.H.E.(1981). *Statistics in Psychology and Education*. Vakils, Feffer and Simons Ltd.

QUESTION PAPER PATTERN –UG*

Knowledge Level	Section	Word Limit	Marks	Total	Special Instructions if any
K1	A- 10 x 2 Marks	50	20	100	Question No is compulsory. Section B must have minimum 2 problems and Section C to have minimum of 1 problem
K1,K2	B-5/8 x 8 Marks	200	40		
K2, K3	C-2/3 x 20 Marks	500	40		

Since K1 levels are specified in Part A and Part B and K2 levels as specified in both Part B and Part C and K3 levels are specified in Part C, 40% of questions may be assigned to K1 and K2 levels each and 20 % for K3 level

Semester – III Code: PS21/3N/MEM

Course Title: Managing Emotions

SEMESTER- III

Teaching Hours: 30 Hours

Credits: 2

Course Code: PS21/3N/MEM

L T P: 1 1 0

COURSE OBJECTIVES

1. To enable the students to understand their own emotions and the emotions of others
2. To help the students to manage negative emotions and that of others
3. To help them acquire the wisdom of happiness

Unit I: Definition, characteristics of emotions, types of emotions, functions of emotions. (10 hours)

Unit II: Understanding emotional intelligence (EI) - Definition of EI, EQ versus I Q, Domains of EI, Components of EI, Importance of EI . (10 hours)

Unit III: Skills for enhancing emotional intelligence: activities to help recognize one's own emotion, understand non-verbal communication, conflict resolution strategies, stress reduction techniques to manage emotions (10 hours)

TEXT BOOKS:

1. Budhiraja, G.D (2007), The Art of Happy Living, Pustak Mahal Delhi
2. Walker, V; Brokaw, L (1995), 7th Ed., Becoming Aware, Kendall/Hunt Publishing Co.

RECOMMENDED BOOKS:

1. Weiten, W; Lloyd A.M (2004), 7th Ed., Psychology Applied to Modern Life, Thomson & Wadsworth

E -LEARNING RESOURCES:

1. <http://psychcentral.com/blog/archives/2012/07/03/how-to-manage-emotions-more-effectively/>

QUESTION PAPER PATTERN**Title of the paper: MANAGING EMOTIONS****Max Marks: 50****Course Code: PS21/3N/MEM****Time: 2 Hours****Answer any 10 out of 12 of the following questions: 10 x 5 = 50 Marks**

- 1.
- 2.
- 3.
- 4.
- 5.
- 6.
- 7.
- 8.
- 9.
- 10.
- 11.
- 12.

Semester – IV Code: PS21/4C/FRM Course Title: Fundamentals of Research Methodology

SEMESTER- IV

Teaching Hours: 75 Hours

Credits: 4

Course Code: PS21/4C/FRM

L T P: 3 2 0

COURSE OBJECTIVES:

To enable students to understand

- Basic research concepts.
- The process involved in the formulation of the research problem.
- The criteria for selecting appropriate sample.
- Techniques of observation and data collection
- Make use of report writing skills in their project work.

COURSE OUTLINE:

Unit I: Research Methodology: An Introduction- Definition; Meaning of Research, Objectives of Research, Motivation in Research, Types of Research, The Research Process, Criteria of a Good Research; Problems encountered by Researches in India. (10 hours)

Unit II: The Research Problem, the Hypothesis and Reviewing the Literature: Research Problem: Meaning and characteristics of a problem, ways in which a problem is manifested, Types of Problems. Hypothesis: Meaning and characteristics of a good hypothesis, Types of hypotheses, Sources of Hypotheses and Functions of Hypotheses. Reviewing the Literature: Purpose of Review, Sources of Review. (20hours)

Unit III: Sampling Design: Sampling Design: Census and sample survey, Criteria of selecting a sampling procedure, Characteristics of a Good sample design, Different types of sample design. (15 hours)

Unit IV: Techniques of observation and Data Collection: Questionnaire and schedule, Interview, Observation as a tool of Data Collection, Difference between Participant observation and non-participant observation, Rating Scale. (20 Hours)

Unit V: Writing a Research Report: General purpose of writing a research report, Structure of a research report, Styles of writing a research report, typing the research report, evaluating a research report.

(10hours)

TEXT BOOKS:

Semester – IV Code: PS21/4C/SP1

Course Title: Social Psychology- I

SEMESTER- IV

Teaching Hours: 75 Hours

Credits: 4

Course Code: PS21/4C/SP1

L T P: 3 2 0

COURSE OBJECTIVES:

To enable students to

- Introduce the students to the discipline of social psychology and highlight the influences of various perspectives on it.
- Understand how one perceives the social world around them and apply the theoretical knowledge of attribution and impression management to the real world.
- Understand the relationship between attitude and behavior and thereby enable them to predict social behavior.
- Gain knowledge about various sources of prejudice and thereby devise techniques to reduce prejudice.
- Introduce to classic studies on conformity and understand the reasons for conformity and non-conformity and factors influencing it.

COURSE OUTLINE:

Unit I: Introduction to Social Psychology: Social Psychology-definition; Social psychology & related disciplines; Social Psychology in the new millennium- Influence of cognitive perspective, emphasis on application, adoption of multicultural perspective, Role of biological factors and evolutionary perspective. (15 Hours)

Unit II: Social Perception Attribution- theories of attribution: Theory of Correspondent Influence, Kelley's theory of Causal Attributions, Augmenting, Discounting, Regulatory Focus theory; Attribution Errors- Correspondence Bias, Actor- Observer effect, Self- Serving bias; Application of Attribution theory, Impression formation and Management. (15 Hours)

Unit III: Attitudes and Behavior

Attitude formation: Development of attitudes, Relationship between attitude and behavior- Influence of attitude on behavior and behavior on attitudes; Explanation for the effect of actions on attitudes- Self- Presentation, Self- Justification, Self- Perception. (15 Hours)

Unit IV: Prejudice: Definition - Sources of Prejudice- Social Sources: Social inequality, Social Identity, Conformity, Institutional Supports; Emotional sources: Frustration and Aggression, Personality Dynamics; Cognitive Sources: Categorization, Distinctiveness, And Attribution. Cognitive consequences of Stereotypes. Techniques for Reducing Prejudice. (15 Hours)

Unit V: Conformity: Classic studies- Sherif, Asch, Milgram's obedience studies: Situations in which people conform- Group Size, Unanimity, Cohesion, Status, Public Response, No Prior Commitment; Reasons for Conformity- Normative influence, Informational influence, Personality, Culture. Influence of personality and culture; Resisting Pressures to conform- Reactance, Asserting Uniqueness. (15 Hours)

TEXT BOOKS:

Semester – IV Code: PS21/4A/ST2

Course Title: Statistics for Psychology II

SEMESTER- IV

Teaching Hours: 90 Hours

Credits: 5

Course Code: PS21/4A/ST2

L T P:4 2 0

COURSE OBJECTIVES:

- To enable the students to understand the concepts in inferential statistics
- To familiarize students with the procedure for hypothesis testing and procedure for estimating the population mean
- To enable students to understand procedure involved in determining significance of mean
- To enable students to understand procedure involved in determining significance of mean difference
- To throw light on the difference between parametric and non-parametric tests and enable computation of chi-square analysis.

COURSE OUTLINE:

Unit I: Key concepts in Inferential Statistics: Z scores, The normal curve- Characteristics and properties, Measures of asymmetry: Skewness & kurtosis, Applications of the normal curve, Sample vs. Population, Distribution of sample means, Standard error and Probability. (20 hours)

Unit II: Introduction to hypothesis testing and Estimation: The logic of hypothesis testing, Uncertainty and errors in hypothesis- Type I and Type II errors, Factors that influence a hypothesis test, assumptions for hypothesis test with z scores, Directional and non-directional hypothesis test. Comparison of one tailed versus two –tailed tests of significance. Estimation: Two ways of making estimates- Point and Interval estimates. (15 hours)

Unit III: Introduction to the t statistic: The t statistic: An alternative to z. Hypothesis tests with the t statistic. The t statistic for Independent measures and related measures research design. (20 hours)

Unit IV: Introduction to ANOVA: Procedure for determining significance of difference. ANOVA-Meaning; Logic of ANOVA, Computation of one way analysis of variance (20 hours)

Unit V: Introduction to Non –parametric test: Difference between parametric and non parametric test. Chi Square Statistic: Tests of goodness of fit and independence. Assumptions, Uses and Limitations of chi square test. Non-Parametric Alternatives to t- test, ANOVA and Correlation - The Mann Whitney U Test, Kruskal Wallis Test and Spearman’s Rank Correlation. (15 hours)

COURSE OUTCOMES

CO.No	CO Statement
CO1	Comprehend basic ideas about making conclusions about population from data collected from samples
CO2	Develop skills to generate hypothesis depending on the nature of the research Question
CO3	Understand the process involved in testing the population mean from sample mean and infer appropriately
CO4	Compare the populations with respect to variable under study to evaluate whether statistical significant difference indicate real difference
CO5	Gain knowledge on non-normal distributions and statistics associated with it

Mapping of CO with PSO

QUESTION PAPER PATTERN –UG*

Knowledge Level	Section	Word Limit	Marks	Total	Special Instructions if any
K1	A- 10 x 2 Marks	50	20	100	Question No is compulsory. Section B must have minimum 2 problems and Section C to
K1,K2	B-5/8 x 8 Marks	200	40		

K2, K3	C-2/3 x 20 Marks	500	40	have minimum of 1 problem
---------------	-------------------------	------------	-----------	----------------------------------

Since K1 levels are specified in Part A and Part B and K2 levels as specified in both Part B and Part C and K3 levels are specified in Part C, 40% of questions may be assigned to K1 and K2 levels each and 20 % for K3 level

Semester – IV

Code: PS21/4N/ISS

Course Title: Improving Study Skills

SEMESTER- IV**Teaching Hours: 30 Hours****Credits: 2****Course Code: PS21/4N/ISS****L T P: 1 1 0****COURSE OBJECTIVES**

1. To help the students analyze their strength and weakness, identifying their learning styles and improving study habits
2. To enable to the students to learn strategies and techniques to improve study skills and academic performance

COURSE OUTLINE

Unit I: Effective Studying and Learning Styles: Study skills definition. Developing sound study habits. Understanding learning styles. (10 hours)

Unit II: Strategies for improving academic performance: Notes taking- Effective note taking strategies and creating a mind map. Test-taking skills – Test day strategies and avoiding test anxiety. Critical reading and thinking (10 hours)

Unit III: Techniques for improving study skills: SQ3R Method, Mnemonics, Chunking procedures, Use of imagery. (10 hours)

TEXT BOOKS:

1. Hockenbury, H.D; Hockenbury E.S, (2003), Psychology, 3rd ed., Worth Publishers
2. Weiten, W; Lloyd A.M (2004), 7th Ed., Psychology Applied to Modern Life, Thomson & Wadsworth

RECOMMENDED BOOKS:

1. Ciccarelli, K.S; Meyer, E.G,(2007), Psychology, Pearson Education.
2. Passer W.M; Smith E.R (2007), 3rd ed., Psychology ‘The Science of Mind &Behaviour, Tata Mc Graw-Hill

QUESTION PAPER PATTERN

Title of the paper: IMPROVING STUDY SKILLS

Max Marks: 50

Course Code: PS21/4N/ISS

Time: 2 Hours

Answer any 10 out of 12 of the following questions: 10x 5 = 50 Marks

- 1.
- 2.
- 3.
- 4.
- 5.
- 6.
- 7.
- 8.
- 9.
- 10.
- 11.
- 12.

Semester – V Code: PS21/5C/AB1

Course Title: Abnormal Psychology I

SEMESTER – V

Teaching Hours: 90 Hours

Credits: 4

Course Code: PS21/5C/AB1

L T P: 4 2 0

COURSE OBJECTIVES:

To enable the students to understand

- The Evolution of Abnormal Psychology and the Classification Systems.
- The Causes and Treatment of Anxiety.
- The Causes and treatment of Dissociative and Somatic Symptom Disorders
- The Types and Treatment of Sexual Variants, Gender related disorders and Sexual Abuse
- The manifestation, causes and treatment of Personality Disorders.

COURSE OUTLINE:

Unit I: Introduction: Definition of Abnormal Psychology; The DSM -5 and the Definition of Mental Disorder. Historical Views of Abnormal Behavior. Views of Abnormality during the Middle Ages. Humanitarian Approaches. Nineteenth Century Views of the Causes and Treatment of Mental Disorders. Changing attitudes toward Mental Health in the Early Twentieth Century. Contemporary Views of Abnormal Behavior. Need for Classification of Mental Disorders. Introduction to the DSM-5 and the ICD-10. Disadvantages of a classification system. (20 hours)

Unit II: Disorders of Panic, Anxiety and Obsessions: Symptoms of Anxiety Disorders, Panic Attacks, Phobias. Diagnosis of Anxiety Disorders : Specific Phobia, Social Anxiety Disorder, Agoraphobia, Panic Disorder, Generalised Anxiety Disorder. Course and Outcome. Comorbidity. Anxiety Disorders Across the Life Span. Causes of Anxiety Disorders : Adaptive and Maladaptive Factors, Social Factors, Psychological Factors, Biological Factors. Treatment of Anxiety Disorders. Obsessive Compulsive and Related Disorders - Symptoms of OCD, Diagnosis of OCD and Related Disorders, Causes of OCD, Treatment of OCD. (10 hours)

Unit: III Dissociative and Somatic Symptom Disorders : Dissociative Disorders : Meaning, Symptoms of Dissociative Disorders, Diagnosis of Dissociative Disorders, Causes of Dissociative Disorders : Psychological, Biological and Social Factors, Treatment of Dissociative Disorders. Somatic Symptom Disorders : Symptoms of Somatic Symptom Disorders, Diagnosis of Somatic Symptom Disorder, Gender SES and Culture, Causes of Somatic Symptom Disorders : Biological, Psychological and Social Factors, Treatment of Somatic Symptom Disorders (10hours)

Unit IV: The Paraphilic Disorders, Gender Dysphoria, Transsexualism and Sexual Abuse

Paraphilic Disorders : Symptoms, Diagnosis, Causes : Biological, Social and Psychological Factors. Treatment. Gender Dysphoria : Symptoms, Causes, Treatment. Transsexualism : Features and Treatment. Sexual Abuse : Childhood Sexual Abuse, Incest, Rape, Treatment and Recidivism of Sex Offenders.

(20 hours)

Unit V: Personality Disorders: Clinical features of Personality Disorders. Cluster A Personality Disorder: Paranoid Personality Disorder, Schizoid Personality Disorder and Schizotypal Personality Disorder. . Cluster B Personality Disorders : Histrionic Personality Disorder, Narcissistic Personality Disorder, Antisocial Personality Disorder, Antisocial Personality Disorder and Psychopathy and Borderline Personality Disorder. Cluster C Personality Disorders: Avoidant Personality Disorder, Dependent Personality Disorder, Obsessive-Compulsive Personality Disorder. Causal factors, Treatments and Outcomes. (20 hours)

TEXT BOOKS:

COURSE OUTCOMES

CO.No	CO Statement
CO1	Understand abnormal behaviour patterns and apply the knowledge to assessment, diagnosis and classification systems
CO2	Enhance personal and social functioning by understanding and analyzing reasons for neurotic conditions and analyse the impact of these conditions and control them.
CO3	Identify varied sexual variants and abuse and comprehend the manifestation of gender dysphoria and transsexualism.
CO4	Comprehend the categories of sexual variants and its treatment. Explore Gender related disorders and examine the different types of sexual abuse and interventions.
CO5	Examine the categories of personality disorders and critically evaluate the manifestation of these conditions on day-to-day functioning

QUESTION PAPER PATTERN –UG*

Knowledge Level	Section	Word Limit	Marks	Total	Special Instructions if any
K1	A- 10 x 2 Marks	50	20	100	Question No is compulsory. Section B to have at least one question from every unit. Section C not to have more than one question from the same unit
K1,K2	B-5/8 x 8 Marks	200	40		
K2, K3	C-2/3 x 20 Marks	500	40		

Since K1 levels are specified in Part A and Part B and K2 levels as specified in both Part B and Part C and K3 levels are specified in Part C, 40% of questions may be assigned to K1 and K2 levels each and 20 % for K3 level

Semester – V Code: PS21/5C/PST

Course Title: Psychological Testing

SEMESTER- V

Teaching Hours: 90 Hours

Credits: 4

Course Code: PS21/5C/PST

L T P: 0 2 4

COURSE OBJECTIVES:

To enable students to:

- Equip themselves with the knowledge and skills in the practice of psychological assessment for a variety of assessment such as Personality, Intelligence, Thinking and general attitudes and behaviour
- Administer and Score assessment measures
- Evaluate objectively the results and draw inferences.
- Write a report based on the data obtained.

LIST OF TESTS (Any 8)

1. Type A Type B Behavior Pattern Scale – *Dhar, U. (2001)*
2. Locus of Control – *Vohra, S. (1992)*
3. Sentence Completion Test – *Dubey, L.N. & Dubey, A. (1987)*
4. Comprehensive Interest Schedule – *Vohra, S. (1993)*
5. Raven’s Standard Progressive Matrices – *Raven, J., Raven, J.C. & Court, J.H. (2000)*
6. Bhatia’s Battery of Performance Test
7. Cognitive Style Inventory – *Jha, K.P.(2001)*
8. Cognitive Distortion Scale – *Sisodia, S. D., & Sharma, D. (2012).*
9. Styles of Learning and Thinking (SOLAT) – *Venkataraman, D. (1994)*
10. Parenting Scale – *Bharadwaj ,R.L., Sharma,H., & Garg, A. (1998)*
11. EQ- Emotional Quotient – *Chadha, N.M. (2012)*
12. Deo-Mohan Achievement Scale – *Deo, P. & Mohan, A. (2011)*
13. Tweezer Dexterity Test – *Jagdish, & Bhargava, V. (1997)*
14. Minnesota Rate of Manipulation
15. Stroop Effect

Internal Evaluation: 40 Marks.

External Evaluation: Double valuation for 60 Marks

Semester – V Code: PS21/5C/SP2

Course Title: Social Psychology - II

SEMESTER- V

Teaching Hours: 90 Hours

Credits: 4

Course Code: PS21/5C/SP2

L T P:4 2 0

COURSE OBJECTIVES:

To enable the students to

- Get acquainted to functions of a group and its influences on individual performance and to educate them about the potential dangers of decision making in group.
- Understand the dynamics of intimate relationships such as friendship and love.
- Be introduced to the theories that explain selflessness and to suggest ways to increase helping behavior.
- Be imparted with knowledge about various theories that explain aggression and apply the knowledge to prevent and control aggression.
- Understand the nature of conflict and ways to promote peace in the society.

COURSE OUTLINE:

Unit I: Group Processes: Functions of group; Influence of group on individual performance - social facilitation, social loafing; Decision making in groups- nature, polarization; potential dangers- group think, biased processing. (15 Hours)

Unit II: Interpersonal attraction & intimacy: Friendship – Proximity, Physical Attractiveness, Similarity versus Complementarity, Liking those who like us, Relationship rewards. Love – Passionate love, Companionate love. Maintaining Close relationships – Attachment, Equity, self-disclosure. (20 Hours)

Unit III: Altruism: Altruism- Social exchange theory, Social norms, Evolutionary Psychology, Situational, Personal influences, Role of gender and similarity, Increasing helping behaviors. (15 Hours)

Unit IV: Aggression: Theoretical Perspectives- Biological theories, Drive theories, Modern theories; Determinants of aggression- Social determinants, Situational determinants; Prevention and control of aggression. (20 Hours)

Unit V: Conflict and Peacemaking: Conflict- Social dilemmas, competition, perceived injustice; Misperception. Peacemaking- contact, co-operation, communication, conciliation. (20 Hours)

TEXT BOOKS:

1. Baron A & Byrne. (2003) *Social Psychology* 10th Edition, Prentice Hall.

https://www.slideshare.net/Davis_1304/conflict-and-peacemaking

COURSE OUTCOMES:

CO.No	CO Statement
CO1	Illustrate group influences and apply the knowledge to explain day to day events
CO2	Critically examine intimate relationships and infer the dynamics of intimate relationship

	such as friendship and love.
CO3	Identify reasons for why, when people help and devise strategies to promote prosocial behavior
CO4	Summarise factors that cause aggression and apply the knowledge to avert and reduce aggression
CO5	Understand the dynamics involved in conflict and explore ways of conflict resolution.

Semester – V Code: PS21/5E/ELP

Course Title: Elective - I Educational Psychology

SEMESTER- V

Teaching Hours: 90 Hours

Credits: 5

Course Code: PS21/5E/ELP

L T P: 4 2 0

COURSE OBJECTIVES:

To enable students to understand

1. Need, use and methods of educational psychology.
2. Various basic theoretical stands in educational psychology.
3. Diverse conditions that play a role in the field of education.
4. In-depth about various conditions that make teaching effective.
5. Educational implications in the area of exceptionality and special education.

UNIT I - Introduction to Educational Psychology – Meaning and definition, Nature and Scope – Need for Educational Psychology – Methods of Educational Psychology (15 hours)

UNIT II - Conceptual and Theoretical Perspectives in Educational Psychology: Behaviouristic and Social Learning, Cognitive & Humanistic Perspectives, Constructivism (15 hours)

UNIT III - Human Diversity and Education: Differences in Cognitive Styles & Learning Strategies, Readiness for Learning & Classroom Achievement, Intelligence, Creativity & Personality; Socio-cultural Differences: Gender, Socio-Economic Status, Regional, Ethnic & Linguistic Diversity (20 hours)

UNIT IV - Effective Teaching and Classroom Management: Characteristics of Effective Teachers; Teaching Methods & Issues related to Technological Advances; Classroom Management (20 hours)

UNIT V - Exceptionality and Special Education: Conceptualizing Exceptionality: Categorization, Labelling and its educational implications; Responsibilities of Teachers towards learners with Special Needs (20 hours)

Semester – V Code: PS21/5E/HTP

Course Title: Elective – II Health Psychology

SEMESTER- V

Teaching Hours: 90 Hours

Credits: 5

Course Code: PS21/5E/HTP

L T P: 4 2 0

COURSE OBJECTIVES:

To enable students to understand

- Need and perspectives of health psychology.
- Various models available to conceptualize health.
- Illness behaviours and importance of patient - practitioner communication
- The influence of stress and pain on health and the importance of social support in managing stress and pain
- The nature pain and its management.

COURSE OUTLINE:

Unit I: Introduction: Definition of Health and its Domains, Definition and Goals of Health Psychology, Brief History of Health Psychology, Perspectives in Health Psychology. (15 hours)

Unit II: Theoretical Models of Health Behaviour Change: Factors determining healthy behaviours: Biological, Psychological and Social. Key theories of Health behavior change: Trans-theoretical Model, Health Belief Model, Theory of Reasoned Action and Planned Behavior, The Health Action Process Model, Social Cognitive theory (15 hours)

Unit III: Factors surrounding Illness Behaviours: The commonsense model of illness Behaviour. Recognizing Symptoms: The confirmation bias, Attribution and Misattribution, Personality. Seeking treatment: The role of Culture. Understanding delays, The hospital setting, Staff relations, Adherence to treatment. Patient practitioner Interactions: Nature, Results of poor patient provider

communication, Improving patient provider communication and Reducing Non- adherence.
(20 hours)

Unit IV: Stress, Coping and Social Support: Definition of Stress and Stressor; Theoretical Explanations of Stress- the General Adaptation Syndrome, Transactional Theory of Stress, Diathesis Stress Model, Life- Events Theory, Tend and Befriend Theory, Theory of Learnt Helplessness; Coping Strategies: Emotion-Focused and Problem-Focused types; Coping Interventions: Relaxation Mindfulness Training, Disclosure and Coping, Relaxation Training, Expressive writing & Self affirmation. Cognitive Therapies: Stress Inoculation Training, Rational Emotive Therapy. Social support: Main Forms of Social support, Theories of Social Support Change: Social Convoy Model and Socio-emotional Selectivity theory. Effects of Social Support on Illness (20 hours)

Unit V: Pain and its management: Pain: Definition and Types of Pain. Theories of pain: Specificity theory, Pattern theory, Affect theory, Gate control theory and Neuromatrix theory. Clinical Issues in pain management: Acute & Chronic pain , Pain & Personality. Basic Measures of Pain. Pain Control Techniques : Pharmacological, Surgical and Sensory control of pain. Cognitive behavioural Methods of pain control: Progressive relaxation, Meditation, Hypnosis & Biofeedback , Cognitive behaviour therapy. Self Management of Chronic Pain. (20 hours)

QUESTION PAPER PATTERN –UG*

Knowledge Level	Section	Word Limit	Marks	Total	Special Instructions if any
-----------------	---------	------------	-------	-------	-----------------------------

K1	A- 10 x 2 Marks	50	20	100	Question No is compulsory.
K1,K2	B-5/8 x 8 Marks	200	40		
K2, K3	C-2/3 x 20 Marks	500	40		

Since K1 levels are specified in Part A and Part B and K2 levels as specified in both Part B and Part C and K3 levels are specified in Part C, 40% of questions may be assigned to K1 and K2 levels each and 20 % for K3 level

Semester – V Code: PS21/SS/POP

Course Title: Self- Study Paper- Positive Psychology*

SEMESTER – V

Course Code: PS21/SS/POP

Credits: 2

COURSE OBJECTIVES

- To understand the concepts of positive psychology
- To understand the implications of positive psychology for the well-being of self and society
- Generate research questions and strategies based on principles of positive psychology

UNIT I

Introduction to Positive Psychology: Assumptions, Goals and Definitions; A brief history of positive psychology – Martin Seligman and positive psychology, - Life Above Zero

UNIT II

Positive Emotions – The Broaden-and-Build Theory of Positive Emotions; Positive Emotions and Well-being ; Cultivating Positive Emotions – Flow Experiences, Savoring. Optimism – Dispositional optimism, Optimism as explanatory style, Varieties of Optimism; Hope theory.

UNIT III

Resilience – Definition; Sources of Resilience – In Children, In Disadvantaged Youth, In Adulthood and Later Life – Growth through Trauma

UNIT IV

Forgiveness; Gratitude – Increasing well-being by counting one’s blessings.

UNIT V

Religion and Spirituality- defining Religion and Spirituality; Religion/Spirituality and well being; Religious Orientation; Styles of Religious coping. Mindfulness and wellbeing; mindfulness meditation; mindfulness and Positive Psychology Research

*SELF STUDY

The Self study paper is offered only to the students with no arrears and who has distinction (75%) in the first four semesters. However, enrolment to the paper is not mandatory. It is left to the choice of the student. Evaluation is internal for 100 marks. If a student is not obtaining the minimum 40 marks on 100 marks she will not be able to take it up as an arrear/ supplementary for this paper. It is however mandatory for every student enrolled to pay the examination fee.

COURSE OUTCOMES

CO.No	CO Statement
CO1	To trace the origin of the field of positive psychology and describe the key concepts relating to positive emotions, positive cognitions and positive behavior.
CO2	To experiment the techniques and strategies of positive psychology for enhancement of self and significant others.
CO3	To be able to come up with pertinent research questions to find solution(s) for day to day requirements.

QUESTION PAPER PATTERN

Title of the paper: Self- Study Paper : Positive Psychology

Max Marks: 100

Course Code: PS21/SS/POP

Time: 3 Hours

Part – A

ANSWER ANY 10 OUT OF 12 QUESTIONS

(10 x 4 = 40)

Part – B

ANSWER ANY 3 OUT OF 4 QUESTIONS

(3 x 20 = 60)

Knowledge levels for the question paper will have to be set at K4 & K5.

Semester – VI Code: PS21/6C/AB2

Course Title: Abnormal Psychology-II

SEMESTER – VI

Teaching Hours: 90 Hours

Credits: 4

Course Code: PS21/6C/AB2

L T P: 4 2 0

COURSE OBJECTIVES:

To enable students to understand:

1. The clinical picture, causal factors and treatment for Mood Disorders
2. The clinical picture, causal factors and treatment for Schizophrenia.
3. The causes and treatment of Alcohol Related Disorders and an overview of Psychoactive Drugs.
4. The classification, causes and treatment of childhood disorders.
5. The causes and treatment of Neuro-developmental disorders.

COURSE OUTLINE:

Unit I: Mood disorder and Suicide

Mood Disorders: An Overview, Types of Mood Disorders. Unipolar Depressive Disorders: Major Depressive Disorder, Persistent Depressive Disorder. Bipolar and Related Disorders: Cyclothymic Disorder, Bipolar Disorders (I and II). Causes: Social Factors, Psychological Factors and Biological Factors. Integration of Social, Psychological and Biological Factors,. Treatments and Outcomes. Suicide: Classification of Suicide, Causes of Suicide, Treatment for Suicidal People. **(20 hours)**

Unit II: Schizophrenia: Schizophrenia

Clinical picture, Subtypes, Other Psychotic Disorders, Risk and Causal Factors, Treatment and Outcomes. **(20 hours)**

Unit III: Substance Related Disorders

Introduction. Alcohol Related Disorders: Prevalence, Co-morbidity and Demographics. The Clinical Picture Of Alcohol Related Disorders. Causal Factors and Treatment. Drug Abuse and Dependence: Opium and Its Derivatives (Narcotics), Stimulants, Sedatives, Hallucinogens.

(15 hours)

Unit IV: Disorders of childhood and adolescence

Classification of childhood and adolescent disorders. Anxiety and Depression in Children and Adolescents. Disruptive, Impulse – Control and Conduct Disorder. Elimination Disorders (Enuresis, Encopresis). **(15 hours)**

Unit V: Neurodevelopmental Disorders

Attention Deficit / Hyperactivity Disorder (ADHD) Autism, Spectrum Disorders. Tic Disorders Specific Learning Disorders. Intellectual Disability: Levels of Intellectual Disability and Causal Factors in Intellectual Disability, Treatments, Outcomes and Prevention. Special Consideration in the Treatment of Childhood and Adolescents. **(20 Hours)**

Semester – VI Code: PS21/6C/HRM

Course Title: Human Resource Management

SEMESTER – VI

Teaching Hours: 90 Hours

Credits: 4

Course Code: PS21/6C/HRM

L T P: 4 2 0

COURSE OBJECTIVES:

To enable the students to understand

- The nature and scope of Human Resource Management
- The role of job analysis, job design and job evaluation in developing and managing employees
- The intricacies involved in recruiting and selecting the right talent
- The need for training and the process involved in training
- The distinction between career management and talent management

COURSE OUTLINE:

Unit I: Understanding the nature and scope of Human Resource Management: Nature of HRM, HRM functions, HRM: Functions and objectives, Organization for HR Department, HRM Paradoxes, Personnel Policies and Principles, Skills for HR Professionals, Line Managers, HRM Models, Jobs and careers in HRM, Reason to study HRM, Nature of Strategic HRM, Strategic HRM versus conventional HRM, Strategic Management Process, Benefits of SHRM, Barriers to Strategic HRM, Typical HR strategies, Selecting strategies to enhance performance. (15 hours)

Unit II: Analysis of Work, Designing jobs and Job Evaluation: Nature of Job analysis, the process of job analysis, Methods of collecting job data, Job analysis and strategic HRM, Potential Problems with Job analysis, Requisites for job analysis, Competency-based job analysis, job design, Significance of job design, Factors affecting job design, Job design approaches, Contemporary issues in job design, Job evaluation, Job evaluation process, Methods of job evaluation, Alternative to Job evaluation (20 hours)

Unit III: Recruiting and selecting

Nature of recruitment, purposes and importance, Factors governing recruitment, Recruitment process, Evaluation and control, Alternatives to recruitment; Nature of selection, Selection as a source of competitive advantage, Organisation for selection, Selection process, Assessment centres, Barriers to effective selection, Evaluation of selection process, Making selection effective, Selection in India, Placement. (20 hours)

Unit IV: Orientation, Career Management and Talent Management: Orientation, Orientation programme, Requisites of an effective programme, Evaluation of Orientation Programme, Problems of orientation, Typical orientation programme, Management Development, Career development, Talent management. (20 hours)

Unit V: Training and Development: Nature of training and development, Inputs in training and development, training and development as a source of competitive advantage, training process, Impediments to effective training, Way to make training effective, Government Initiative (15 hours)

Course Title: Elective III – CASE STUDIES

SEMESTER – VI

Teaching Hours: 90 Hours

Credits: 5

Course Code: PS21/6E/CS

L T P: 0 2 4

COURSE OBJECTIVES:

To enable students to

1. To understand case study as a method of research
2. Develop ability to make keen and accurate observations of a person or persons in-depth.
3. Conduct a detail study of a person,
4. Gain information through observation, interview, analysis of clinical records and interviewing significant others.
5. Gain in-depth understanding of various developmental areas

***A bridge course on Fundamentals of Case Analysis has been introduced for students in the third year to orient them to the Case Studies paper.**

Case studies (any 2) to be submitted from the following areas:

- Elementary school children
- Adolescence
- Young adulthood
- Middle age
- Old age
- Working Women
- Children with Special needs
- Clinical conditions
- Victims of trauma or Abuse
- Palliative Care
- Chronic Physical illnesses

Each case study should not exceed 30 pages. Students are required to submit an introduction and a case report for each of the chosen area. Students are required to spend a minimum of 60 hours on their 2 cases.

Evaluation of Case Studies can be orientated towards K3 to K6 levels.

Internal Evaluation: 40 Marks.

External Evaluation: Double valuation for 60 Marks

COURSE OUTCOMES

CO.No	CO Statement
CO1	To describe the process of conducting case studies and also compare and contrast case study with other research methods.
CO2	To infer and interpret collected information about an individual from verbal reports, case records and other data
CO3	Understand the challenges of rapport building and devise ways to establish rapport to facilitate in-depth study of a individual
CO4	Prepare interview schedules, conduct standardized tests, analyze records and design activities to collect pertinent data required for detailed description of an individual
CO5	Apply the understanding of developmental theories in describing normative events and also critically evaluate the applicability of the theory to real life situations

Mapping of CO with PSO

CO/PSO	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6

Case reviews/ Case Presentations

Discussion based learning

Semester – VI Code: PS21/6E/SR

**Course Title: Elective III – SURVEY RESEARCH
SEMESTER – VI**

Teaching Hours: 90 Hours

Credits: 5

Course Code: PS21/6E/SR

L T P:0 2 4

COURSE OBJECTIVES:

To enable students

1. To understand concepts related to carrying out survey research
2. To construct checklists to assess participants attitude/preferences/behaviour.
3. To administer standardized psychological test on a predetermined sample and to assess and compare people on certain behavioral/psychological traits.
4. To statistically evaluate and interpret the data received from the survey and generate conclusions.
5. To document information.

Survey in any one of the following areas:

1. Industrial/organizational behavior
2. Mental health issues.
3. Social behavior.
4. Family/parenting/relationship.
5. Consumer behavior
6. Environmental issues

Project report should not exceed 50 typed pages.

Evaluation of survey research can be orientated towards K3 to K6 levels.

Internal Evaluation: 40 Marks .

External Evaluation: Double valuation for 60 Marks
