DAILY TICKETING SYSTEM

OVERVIEW:

This ticketing system is a management tool that process the service requests. Tickets, also known as cases or issues, need to be properly stored alongside relevant user information. A ticket is a work request created in response to a situation that requires further investigation.

WORKFLOW:

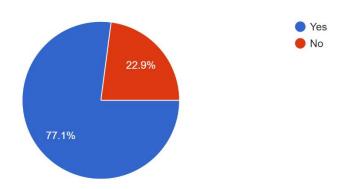

- 1. Raise a Ticket
 - a. One can raise a ticket using a URL link for the form or using a QR Code.
 - b. QR code will be in every department.
- 2. Assigning a Ticket
 - a. Once the response has been filled the ticket will be assigned to the IT Team
- 3. Process of Ticket Resolving
 - a. Once the ticket assigned to the IT Team, the IT team will start the work immediately to solve the issue.
- 4. Closing a Ticket
 - a. Once the problem is solved, the support Engineer will close the ticket using a form.
