

ETHIRAJ COLLEGE FOR WOMEN (AUTONOMOUS)

CHENNAI – 600 008

**DEPARTMENT OF PLANT BIOLOGY AND
PLANT BIOTECHNOLOGY**

M.Phil., SYLLABUS

FOR CANDIDATES

ADMITTED DURING THE YEAR

2018-2019 ONWARDS

M.Phil PLANT BIOLOGY AND PLANT BIOTECHNOLOGY 2018-2019 ONWARDS

COURSE PROFILE

CORE/ELECTIVE	TITLE OF THE PAPER	PAPER CODE
CORE 1	Research Methodology	10M18/REM
CORE 2	Advanced Plant Biotechnology	10M18/ADP
ELECTIVE 1	Genetics	10M18/GES
ELECTIVE 2	Herbal Botany	10M18/HEB
ELECTIVE 3	Plant Pathology	10M18/PLP
	Dissertation	10M18/DSN

The above courses of the M.Phil programme enrich the skills in

Employability,
skill development/
Entrepreneurships which
caters the needs of the
students

M.PHIL- PLANT BIOLOGY AND PLANT BIOTECHNOLOGY

SEMESTER 1

CORE PAPER I- RESEARCH METHODOLOGY

COURSE CODE: 10M18/REM

CREDIT-5

UNIT I Microscopic technique:

Light microscope – Principle, construction and application –Dark field, Phase contrast, Fluorescence microscope.Principle, construction, sample preparation and application of electron microscope – SEM, TEM. Cytophotometry – Flow Cytometry

UNIT II

General Lab Technique:

pH Buffering mechanism. Choice and preparation of common buffers – Potassium Phosphate buffer and Tris Acetate Buffer. pH measurements. Methods of sterilization of media and Glassware. Media – Choice of media, isolation, purification and maintenance of Algae, Fungi and Bacteria.Methods of Determining microbial number – Batch culture, continuous culture. Application of Fermenters.

UNIT III

Separation Technique:

Centrifugation:

Principle of sedimentation, Relative Centrifugal Force (G), Types and uses of Centrifuge – Bench top Centrifuge, Large capacity centrifuge, High Speed Refrigerated Centrifuge, Preparatory centrifuge and analytical centrifuge. Zonation and Isopycnic Centrifuge.

Chromatography- Principle, procedure, applications-TLC, Column chromatography, Ion exchange chromatography, HPLC, HPTLC, GC-MS.

Electrophoresis- General principle-factors affecting electrophoresis samples, principle, procedure and applications-Agarose gel, PAGE and SDS-PAGE.

UNIT IV

Immunotechnique:

Properties and type of Antibody and Antigen. Application and Production of Monoclonal antibodies and Polyclonal antibodies. Immunodiffusion, Immunoelectrophoresis, Immunolabelling – Biotin. ELISA.

UNIT V STATISTICAL METHODS:

Measurement of dispersion – range, variance, standard deviation, standard error. Test of significance based on large sample-small sample – Student t-test – ANOVA and DMRT. Probability – Probability distribution – Binomial, Poisson, and Normal. Simple correlation and Regression. Computer application - SPSS package, Scientific writing – Manuscript preparation, citation style. Types and characteristics – Designing the research work.

8. Gurumani, N. (2006) Research Methodology for Biological Science, MJP publications, India
9. R.A.Day.How to write a scientific paper,Cambridge University Press.
10. Methodology of Scientific Research Programs Cambridge University Press.
11. Research Methodology,Standford University.
12. Journal of Immunological Methods ,Elsevier Publication.
13. The Indian Journal of Statistics, Springer Publication.

M.PHIL- PLANT BIOLOGY AND PLANT BIOTECHNOLOGY

SEMESTER 1

CORE PAPER II- ADVANCED PLANT BIOTECHNOLOGY

COURSE CODE:10M18/ADP

CREDITS -5

Unit I Microbial and Cell Fraction Technique:

Cell and Tissue culture-Microbial culture, plant cell and tissue culture,cell sorting ,culture collection, cryopreservation. Cell fraction-Solid shearing, liquid shearing, high pressure extrusion, ultrasonic oscillation, use of proper osmoticum and antioxidants. French press. Isolation of mitochondria, chloroplast and nucleic acid.

Unit II:

Phytochemical Techniques:

Solvent Extraction- Maceration, Percolation, Cold Percolation, Steam distillation, Extraction of Essential Oils, Soxhlet Extractor.

Isolation of compounds – Quantitative estimation of the isolated compound- Characterisation and Identification.

Unit III

Tools And Techniques:

Basic principle and biological applications - UV, FTIR, Mass spectroscopy and NMR.

Nanoparticles – Green Synthesis- Characterization .

Unit IV Genetic Engineering:

Principles and Method-Southern Blotting, Northern Blotting, Western Blotting, Dot and Slot Blot. Enzymes used in genetic manipulation-Restriction endonucleases and Ligases. Gene transfer technique-Microinjection, biolistic gun, electroporation -principles and applications.

Unit V

rDNA technology: Cloning vectors-Viral DNA, plasmid DNA, cosmids. Molecular marking system for microbes (Lac-Z and GUS), vectors of eukaryotes and their uses in transfer of DNA. DNA sequencing-Maxam and Gilbert method and Dideoxy method. Molecular probes, DNA fingerprinting, DNA microarray. Bioinformatics-sequence analysis and alignment, protein sequencing. Drug discovery-procedure and applications.

Radiolabelling techniques-Half life, types of radiation decay, measurement of radioactivity. Incorporation of radio isotopes in biological tissues and cells. Radio Immuno Assay . Safety guidelines.

3. Plant cell, tissue and organ culture. Springer Lab Manual. Potrykus, I, and G. Spangenberg (eds.). 1995.
4. Gurumani, N. (2006) Research Methodology for Biological Science, MJP publications, India.
5. Gene transfer to plants. Springer Lab Manual. Jones, H. 1996. Plant gene transfer and expression protocols. Methods in molecular biology . 49. Humana Press. Kreuzer, H, and A. Massey. 1996.
6. Recombinant DNA and biotechnology. A guide for teachers. ASM Press, 1996.
7. Westhead, D.R. J.H. Parish & R.M. Twyman. Bioinformatics, Viva Books, 2010.
8. Phytochemical Analysis, N.Raaman, New India Publishing Agency, 2006.
9. Journal of Chromatography A, Selected Edition 2013, SCIE, SSCI, Thomson Reuters.
10. Journal of the American Society for Mass Spectrometry.
11. Essentials of Nanotechnology ,Jeremy Ramsden, Ventus Publishing, ISBN978-87-7681-418-2
12. Plant Biotechnology Journal ,Wiley Online Library
13. Journal of Advanced biotechnology and Bioengineering, Synergy Publication.

M.Phil - DEPARTMENT OF PLANT BIOLOGY AND PLANT BIOTECHNOLOGY

SEMISTER II

ELECTIVE - GENETICS

COURSE CODE: 10M18/GES

CREDITS:5

UNIT I

Cytogenetics: Chromatin and organization of chromosomes. Relation between structure and function of chromatin. Karyotype, Idiogram, Banding methods – Q,G,C,R,N banding. HRT technique. Origin and significance of chromosomal aberrations. Physical, Chemical mutagens and chromosomal damage Structural chromosomal changes.

Molecular Genetics: Introduction – Evidences for DNA as genetic material – Mechanism of DNA replication – The topological problem. Molecular events in transcription- Inhibition of Transcription, Mechanism of Protein synthesis – Inhibition of protein synthesis. Extra Chromosomal protein synthesis.

UNIT II:

Prokaryotic Genetics: Plasmids – Properties and Classification, conjunctive plasmids – Resistance factors - Significance of plasmids. Bacteriophage – properties, Phage mutants, Genetic maps, Phage life cycle, Molecular and enzymatic mechanism. Principles of genetic engineering and gene cloning.

UNIT III:

Eukaryotic Genetics: Alleles – Ultra structure, allelic sites, complementation test, Multiple alleles. Multiple genes– Nature, Mechanism, Quantitative inheritance, Polygene concept. Developmental genetics - Mutation affecting early development, Birth defects due to abnormal Karyotyping - Sex differentiation, Developmental Sex abnormalities – hormones in Development.

UNIT IV:

Genes And Environment: Introduction – Environmental toxicants – Chemical and physical mutagens, carcinogens, Teratogens and their relationship.

Radiation Genetics: Measurements of Radiation – its effect on cells. Cell kinetics and radiation response. Radiation pathology. Radiation alternations – Radiation protection – Clinical applications.

UNIT V:

Molecular mechanism of physical and chemical mutagenesis. Repair system. Test system in screening mutagenesis. Application of mutagenesis in screening environmental toxicants. Plant alkaloids as chemical mutagens.

7. Journal of Genetics And Genomics, Elsevier Publication.
8. Molecular genetics and Genomics, Springer Publication.
9. Journal of Genetics and Plant Breeding, Indian Academy of Sciences publications.
10. Molecular Genetics and Metabolism, Elsevier Publication.

M.Phil - DEPARTMENT OF PLANT BIOLOGY AND PLANT BIOTECHNOLOGY

SEMISTER II

ELECTIVE -HERBAL BOTANY

COURSE CODE: 10M18/HEB

CREDITS:5

UNIT I:

Introduction, impact of plant drugs in human welfare. Regional studies, Recent trends and Socio – economic aspects.

UNIT II:

Principles of collection, preparation/processing and storage of plant drugs. **Methods of classification of plant drugs.** Factors influencing the quality and variability of plant drugs such as geographical factors, climatic factors, soil and nutrients, genetic factors and biotechnology.

UNIT III:

Classification of plant drugs based on the source – Entire Plant, Root , Stem, Bark, Leaf, Flower, Fruit and Seed. Study of medicinal properties and uses with reference to the above.

UNIT IV:

Identification of Plant Drugs – Acid, Alcohol, Ester, Carbohydrates, Phenolic compounds, Volatile oils, Resins, Saponins, Flavonoids, Alkaloids, Vitamins, Hormones and Antibiotics - **Extraction, Isolation and Characterization.**

UNIT V:

Conservation of existing and endangered medicinal plants through **various conservation strategies.**

3. Cultivation & Processing of Medicinal Plants, Chichister, U. K: J. Wiley & Sons. Trease & Evans.
4. Pharmacognosy – William Charles Evans, 14th ed. (1989), Harcourt Brace & Company.
5. Medical Herbalism: The Science Principles and Practices of Herbal Medicine by David Hoffman, Healing Arts Press,2003
6. Journal of Herbal Medicine, Elsevier Publication.
7. Journal of Natural Medicine, Springer Publication.
8. Journal of Botany And Plant Biology, Progress Academic Publishing House.

M.Phil - DEPARTMENT OF PLANT BIOLOGY AND PLANT BIOTECHNOLOGY

SEMISTER II

ELECTIVE – PLANT PATHOLOGY

COURSE CODE: 10M18/PLP

CREDITS:5

UNIT I:

History and principle of plant pathogens. Study of plant infection, host –parasite interaction.

Role of enzymes and toxins in pathogenesis .Symptomatology and dissemination of pathogen.

UNIT II:

Pathological physiology of diseased plants – plant water relations, Photosynthesis, Respiration and Growth.

UNIT III:

Defense mechanism – Structural and Biochemical Genetics of plant diseases. Molecular basis of disease resistance. Molecular tools for detection of plant pathogens.

UNIT IV:

Plant diseases Epidemiology, Modern methods of Disease forecast. Epiphytotic –Causes and decline. Plant Protection – Cultural, Physical, Chemical, Biological.Genetical Breeding and Hybridization.Immunization.

UNIT V:

Common diseases of crop plants with special reference to South India. – Causal Organism, Symptoms and Disease management.
